

Ukrainian Furniture: Full-Cycle Production

A MODERN VIEW ON CLASSIC VALUES
A NEW PERSPECTIVE ON TIME-TESTED PRINCIPLES

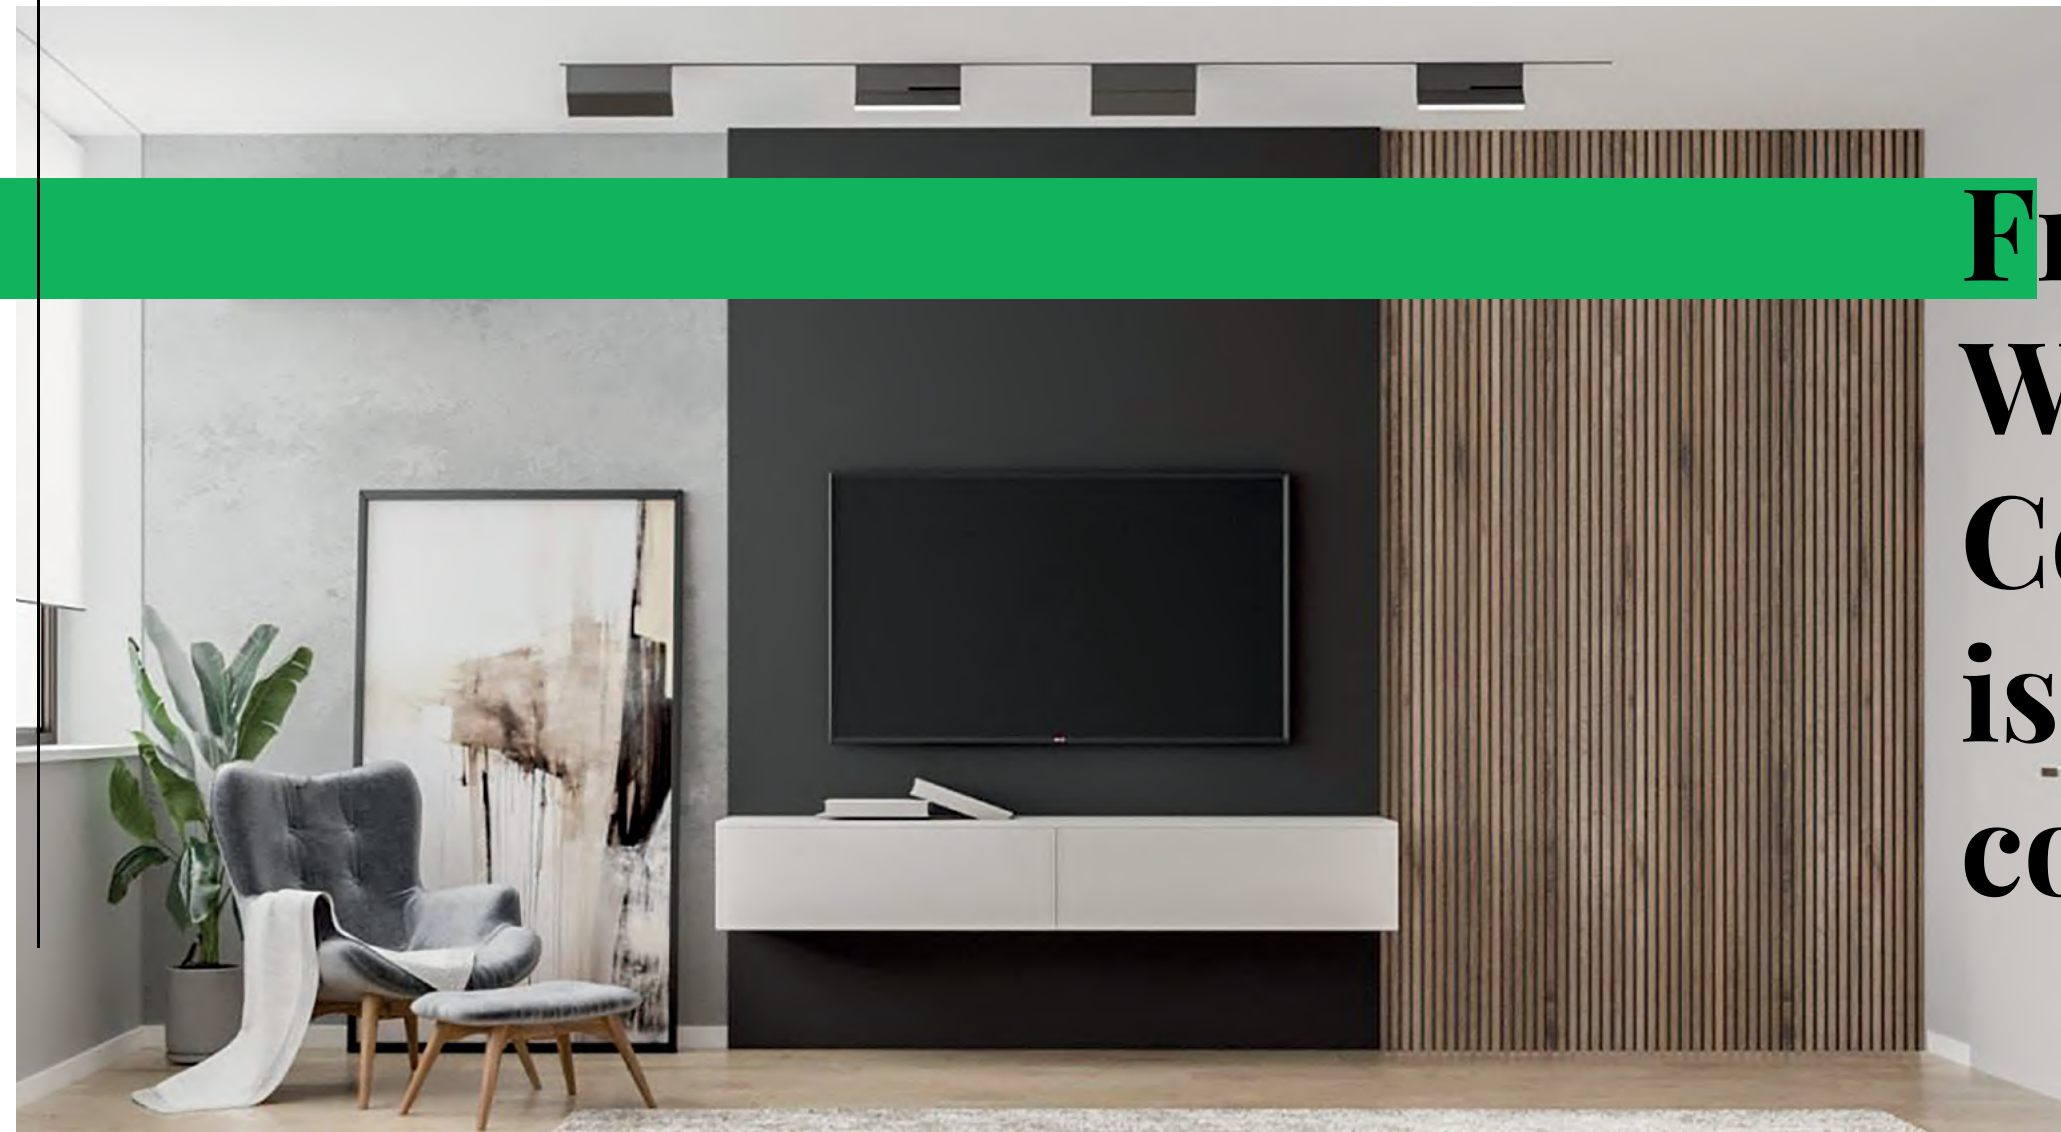

EVERY DETAIL IS IMPORTANT
SOMETIMES ONE SMALL DETAIL MAKES A BIG DIFFERENCE

FURNITURE AS ART

Ideal Interior Solutions

for Your Home

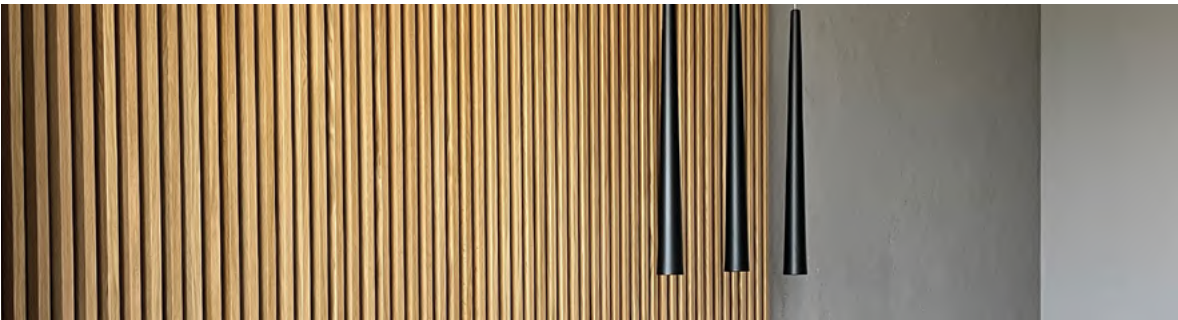

Frop Wooden Corp is a family company.

The company was founded with an idea of creating custom-designed furniture to project the owner's character into interior objects.

It is a passion that has turned into a lifelong business for its owners.

Every project begins with an idea that we bring to life.

When we say that we can bring any project or idea to reality, it is all thanks to our experienced and professional team.

People – our the main value for the company

Our company is divided into several departments:

- solid wood furniture production
- case furniture
- upholstered furniture
- interior structures
- metal elements.

FROP employs experienced professionals in its staff: a technological and design department, material selection, production, installation, and logistics - we involve experts at every stage.

We also collaborate with specialized educational institutions and provide job offers to the best graduates.

Team building is an important part, so we choose ambition, goal oriented and proactive people.

Production

**We do not work
with subcontractors**

**Processes under complete
control**

**We combine technological
capabilities and experience.**

The main feature of our production that we do not work with subcontractors.

All production processes take place in-house under complete control.

We combine technological capabilities and experience with designers' ideas and implement large-scale projects.

**We create a space
where you want to live.**

Metal workshop

All welding and painting works are carried out by us in production.

We manufacture metal parts for tables, beds, stairs, lamps, chairs, as well as make metal partitions and large-scale interior elements.

**with love
for all
processes**

**Ideas
come to life**

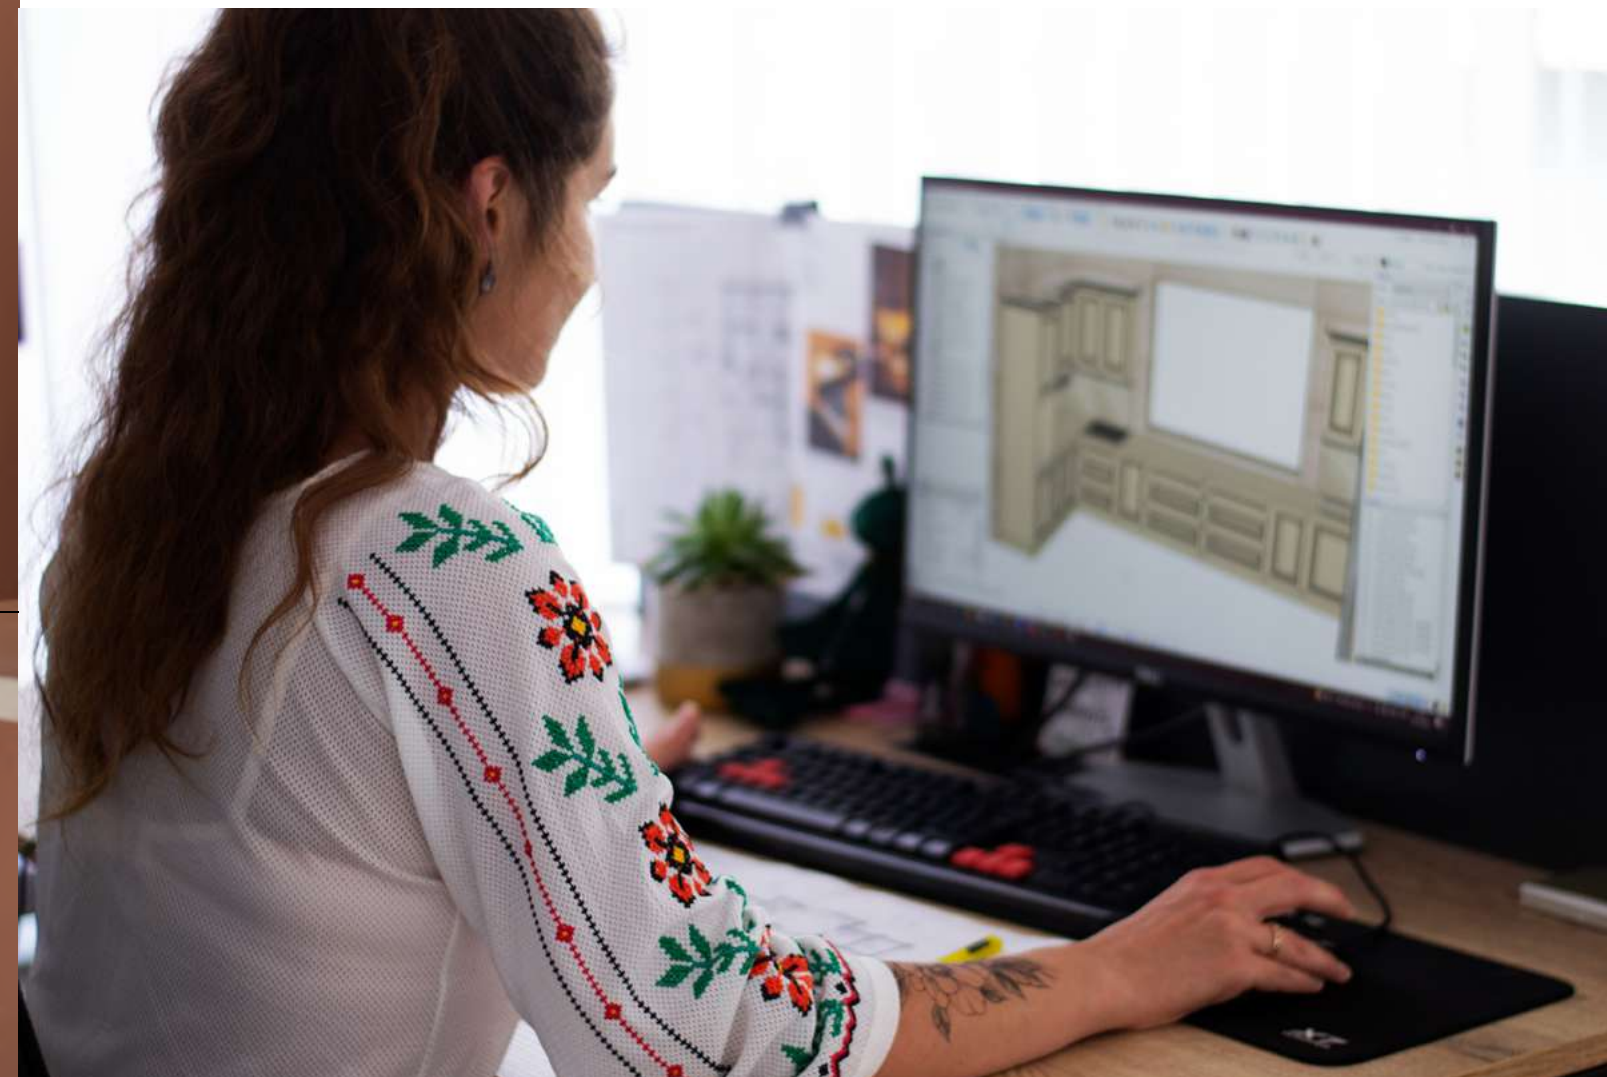

It all starts with the design department, which is an integral and guiding component of the furniture production process.

This department is responsible for developing the technological foundation and bringing the designers' ideas to life while ensuring the functionality of the products.

Thanks to the combination of professional knowledge and technical capabilities, the designers are able to adapt and implement the most daring ideas, creating unique furniture that perfectly fits into the interior concept.

Technologists and developers work with any materials and production technologies, allowing the company to create highly complex and functional furniture.

This makes it possible to solve any interior tasks at a high level of quality and guarantee the precise execution of the assigned tasks.
